Lazada Sales Report | Key findings & Insight

1. The business generated **$6.27M in sales value** from 44,692 items sold. Categories such as **Sets & Suits and Tops & Dresses** emerged as top contributors to overall revenue performance.

2. The return rate stands at **1.90%,** indicating strong customer satisfaction overall. However, some spikes in return value at **6.35%** suggest a need for monitoring to reduce losses and improve quality control.

3. **Customer Lifetime Value** (LTV) distribution shows that most customers fall within the **$100–$250** range, while only a small segment exceeds $500. Implementation of **loyalty strategies** or targeted promotions to shift more customers toward higher is recommended.

4. Product pricing and sales quantity analysis shows an inverse trend: lower-priced items generally sell in higher volumes, especially within Tops & Dresses. This correlation supports **strategic pricing and bundling** to optimize volume and revenue.

5. The **average** purchase quantity per order is approximately **1 item**. This presents an opportunity to introduce product **bundling or cross-selling** strategies to increase basket size and overall order value.
